EXPERIENCE

Emcrey

Jan 2023 – Present

Senior Backend Java Developer

Riyadh, Saudi Arabia

Building Etrade project for Letter of guarantee and letter of credit for Alinma bank

Designed and implemented RESTful microservices in Spring Boot to integrate with SIMA, Wathiq, and Yakeen systems via IBM MQ and Apache Kafka

Developed a notification service (email/SMS) handling 5K+ daily messages with retry logic, dead-letter queues, and monitoring

Applied SOLID principles and domain-driven design

Clover Broker (Freelance)

Jan 2023 – feb 2025

Full Stack .NET Developer (Remote)

Saudi Arabia

Led end-to-end development of an insurance brokerage web platform (ASP.NET Core, SQL Server) with modules for policies, payments, reports, and admin controls

Implemented dynamic Excel import/export with client-side validations using DataTables.js, reducing manual data entry errors by 90% and report generation time by 80%

Integrated GitHub Actions for automated builds and deployments to Azure App Services, enabling bi-weekly releases without production disruption

Designed responsive dashboards using Bootstrap and Chart.js, improving user engagement metrics by 35% based on internal analytics

Onsite Snagging

Jan 2020 – Jan 2023

Lead Full Stack Web Developer

Lebanon

Contributed to full SDLC for a complex enterprise system using ASP.NET Core 3.1, C#, SQL Server, and Telerik UI — delivered 12+ modules on schedule

Built document workflow engine with dynamic forms, scheduler, and audit logging

Developed REST APIs for mobile integration, connecting to Google Maps API, Amazon S3, and NLP services for document classification

Wrote unit tests using xUnit (85% coverage), reducing post-deployment bugs by 50%

Collaborated with a team of 3 developers using JIRA and SVN; led sprint planning and code reviews to maintain quality standards

Exquitech

Jan 2019 – Jan 2020

Full Stack Developer

Lebanon

Refactored legacy VB.NET application using modern C# and SOLID patterns, improving code maintainability

Built a kitchen quality control dashboard with real-time defect tracking and barcode scanning integration for restaurant clients

Developed .net modules classify customer feedback via REST API, integrated into CRM for sentiment analysis

Neorcha

Jul 2018 – Oct 2018

Mobile & Backend Developer

Lebanon

Developed iOS apps in Swift and Objective-C for USEK University and Rotana Hotel booking systems

Built backend services in Java Spring MVC with MySQL, exposing REST APIs consumed by mobile clients

Implemented JWT authentication and secure API endpoints compliant with OWASP guidelines

GridPos

Mar 2018 – Jun 2018

Windows Desktop Developer

Lebanon

Developed Windows desktop apps in C#/VB.NET with Infragistics controls for retail support workflows

Created Crystal Reports and SQL Server Reporting Services (SSRS) dashboards for operational analytics

Provided on-site technical training and hardware setup (printers, cash drawers, network) for 10+ retail clients

PROJECTS

Sports Booking Platform

2023

Microservice-based venue booking system with location tracking ASP.NET Core, Flutter, Google Maps API, Azure

Architected 3 microservices (Booking, Location, Notification) with API Gateway pattern

Implemented centralized logging with Serilog

Integrated Google Maps Places API for real-time venue search and geolocation filtering

Singitak Service Marketplace

2022

Freelancer-to-client platform for local services ASP.NET Core, SQL Server, React (frontend)

Built core functionality: user profiles, service listings and review system

Designed search filters by location, rating, and service type — improved discovery rate by 45% in beta testing

EDUCATION

Lebanese Canadian University

2018

Bachelor of Computer Science

Lebanon

Thesis: "Sports Booking" — focused on modular architecture and API design

Relevant coursework: Software Engineering, Distributed Systems, Security, Operational Research

SKILLS

Languages: C#, Java, JavaScript, SQL, PL/SQL, Swift, VB.net, Python

Frameworks: ASP.NET Core, Spring Boot, Entity framework, Dapper

Cloud & DevOps: Azure (App Services, DevOps), AWS (S3, Lambda), Docker, Kubernetes, GitHub Actions

Architecture: Microservices, REST APIs, Event-Driven Design, Domain-Driven Design (DDD), SOLID Principles

Tools: Git, JIRA, Postman, Swagger, Serilog, XUnit, Crystal Reports

Other: Agile/Scrum, CI/CD Pipelines, API Integration, Database Design (SQL Server, MySQL), Technical Documentation
