PROFESSIONAL SUMMARY

Riyadh-based software engineer with 8+ years of experience across Saudi Arabia and Lebanon. Specialises in Java and .NET banking integrations, insurance platforms and business operations software. Combines backend architecture with end-to-end delivery, including APIs, databases, cloud deployment, reporting and workflow automation.

CORE SKILLS

Enterprise platforms: Java, Spring Boot, C#, ASP.NET Core, REST APIs, microservices, IBM MQ, Kafka.

Business systems: Banking integration, insurance workflows, scheduling, payments, reporting and multi-company operations.

Data & cloud: SQL Server, PostgreSQL, MySQL, Entity Framework, Dapper, Azure, AWS, Docker, GitHub Actions.

Delivery: SOLID, domain-driven design, xUnit, Serilog, JavaScript, Python, Agile/Scrum.

PROFESSIONAL EXPERIENCE

Emcrey | Senior Backend Java Developer

Jan 2023 - Present | Riyadh, Saudi Arabia

- Build Alinma Bank trade-finance services for letters of guarantee and letters of credit using Spring Boot microservices.
- Integrate external verification systems, including Wathiq and Yakeen, through REST services, IBM MQ and Kafka.
- Developed an email/SMS service supporting 5K+ messages daily with retry logic, dead-letter queues and monitoring.

Clover Broker | Full Stack .NET Developer (Freelance)

Jan 2023 - Feb 2025 | Saudi Arabia (remote)

- Led end-to-end delivery of a Saudi insurance brokerage platform with policy, payment, reporting and admin modules in ASP.NET Core and SQL Server.
- Reduced manual data-entry errors by 90% and reporting time by 80% with validated Excel import/export workflows.
- Implemented GitHub Actions and Azure App Service deployment pipelines for regular releases without production disruption.

Onsite Snagging | Lead Full Stack Web Developer

Jan 2020 - Jan 2023 | Lebanon

- Delivered 12+ enterprise modules and a document workflow engine with dynamic forms, scheduling and audit logging.
- Connected mobile clients through REST APIs and integrated Google Maps, Amazon S3 and document-classification services.
- Reached 85% xUnit coverage and reduced post-deployment bugs by 50%; led sprint planning and code reviews.

Exquitech | Full Stack Developer

Jan 2019 - Jan 2020 | Lebanon

- Modernized VB.NET applications in C# and built quality-control, barcode-tracking and customer-feedback integrations.

Peter El-Khoury

Earlier experience, project portfolio and education

EARLIER EXPERIENCE

Neorcha | Mobile & Backend Developer - Jul 2018 - Oct 2018, Lebanon. Built iOS applications and Java Spring MVC/MySQL APIs with JWT authentication.

GridPos | Windows Desktop Developer - Mar 2018 - Jun 2018, Lebanon. Built C#/VB.NET retail applications and Crystal Reports/SSRS reporting; supported client training.

SELECTED PROJECTS

FreshOps | Cleaning and business operations platform

ASP.NET Core, PostgreSQL, JavaScript

- Built a multi-company workspace for bookings, dispatch, teams and payments, with role-based access, recurring schedules and reporting.

Pektrix | AI customer-support chatbot

ASP.NET Core, JavaScript, AI integration

- Built tenant-aware backend services and an embeddable English/Arabic support widget combining AI conversations, messaging and help content.

Peter Personal Trainer | Coaching website and member portal

React, TypeScript, Cloudflare D1/R2, Drizzle ORM

- Built guided assessments, local plan generation, branded PDFs and trainer review; added email-code login, workout logs, check-ins and private member storage.

LeadBot | Automated business research and lead collection

Python, Flask, Redis, Google Sheets

- Built asynchronous multi-engine business research and contact extraction, with a dashboard, CSV export and Google Sheets integration.

Trading scanners | TradingView and P2P market monitoring

JavaScript, Pine Script, .NET, market APIs

- Built scheduled TradingView scans with Telegram reports, plus P2P price comparisons, filters, history and alerts for manual market research.

Sports Booking | Venue discovery and reservation platform

ASP.NET Core, SQL Server, SignalR, Flutter, Google Maps

- Built venue and reservation workflows, geolocation and real-time communication; broader work includes booking/location/notification microservices and an API Gateway.

Singitak | Local service marketplace

ASP.NET Core, SQL Server, React

- Built freelancer/client profiles, service listings and reviews, with location, rating and service-type filters for a local service marketplace.

EDUCATION

Bachelor of Computer Science | Lebanese Canadian University, Lebanon | 2018

Thesis: Sports Booking, focused on modular architecture and API design.
